

Name = Om Kumar

Email ID = omk5938@gmail.com

Assignment Name = Positions in CSS

GitHub = [Link](#)

1.Problem Statement Write code to position 5 equal-sized (50 X 50px) boxes A, B, C, D, and E as follows

box A 200px from the left, and 200px from the top of the viewport

box B -30px left, and -30px above from the center of box A

box B -30px right, and -30px above from the center of box A

box B -30px left, and -30px below from the center of box A

box B -30px right, and -30px below from the center of box A.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>Box Positioning</title>
  <style>
    .box {
      width: 50px;
      height: 50px;
      position: absolute;
      color: white;
      display: flex;
      align-items: center;
      justify-content: center;
      font-weight: bold;
    }

    #A {
      background: red;
      top: 200px;
      left: 200px;
    }

    #B {
      background: blue;
      top: 170px; /* 200-30*/
      left: 170px; /* 200-30*/
    }

    #C {
```

```

background: green;
top: 170px; /* 200-30*/
left:230px; /* 200+30*/
}

#D {
background: orange;
top: 230px; /* 200-30*/
left:170px; /* 200-30*/
}

#E {
background: purple;
top: 230px; /* 200+30*/
left:230px; /* 200+30*/
}
</style>
</head>
<body>

<div id="A" class="box">A</div>
<div id="B" class="box">B</div>
<div id="C" class="box">C</div>
<div id="D" class="box">D</div>
<div id="E" class="box">E</div>

</body>
</html>

```

Output:-

2. Problem Statement Explain the difference between Absolute and Relative positioning.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>Relative vs Absolute Positioning with Shadow</title>
  <style>
    body {
      font-family: Arial, sans-serif;
      padding: 20px;
    }

    h1 {
      color: #333;
    }

    .explanation {
      max-width: 700px;
      margin-bottom: 30px;
      background: #f9f9f9;
      padding: 15px 20px;
      border-left: 4px solid #007bff;
    }

    .box {
      width: 200px;
      height: 200px;
      border: 2px solid black;
      margin: 40px 0;
      position: relative;
      background-color: #fff;
    }

    .relative-box {
      width: 100px;
      height: 100px;
      background-color: lightblue;
      position: relative;
      top: 20px;
      left: 20px;
      line-height: 100px;
      text-align: center;
      font-weight: bold;
      box-shadow: 4px 4px 10px rgba(0, 0, 0, 0.3);
    }
  </style>
</html>
```

```

}

.absolute-box {
  width: 100px;
  height: 100px;
  background-color: lightcoral;
  position: absolute;
  top: 20px;
  left: 20px;
  line-height: 100px;
  text-align: center;
  font-weight: bold;
  box-shadow: 4px 4px 10px rgba(0, 0, 0, 0.3);
}
</style>
</head>
<body>

```

🔍 Relative vs Absolute Positioning in CSS</h1>

<div class="explanation">

<p>Relative Positioning: An element with <code>position: relative</code> is moved relative to its normal position. It still occupies space in the layout, and other elements are not affected by its movement.</p>

<p>Absolute Positioning: An element with <code>position: absolute</code> is removed from the normal document flow. It is positioned relative to the nearest parent that is not <code>static</code>. It does not occupy space in the layout, so it can overlap other elements.</p>

</div>

1 Relative Box Example</h2>

```

<div class="box">
  <div class="relative-box">Relative</div>
</div>

```

2 Absolute Box Example</h2>

```

<div class="box">
  <div class="absolute-box">Absolute</div>
</div>

```

```

</body>
</html>

```

Output:-

Relative vs Absolute Positioning in CSS

Relative Positioning: An element with `position: relative` is moved relative to its normal position. It still occupies space in the layout, and other elements are not affected by its movement.

Absolute Positioning: An element with `position: absolute` is removed from the normal document flow. It is positioned relative to the nearest parent that is not `static`. It does not occupy space in the layout, so it can overlap other elements.

1 Relative Box Example

2 Absolute Box Example

3. Problem Statement Create a card as shown in the picture below. (You can use CSS float property only for layout).

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8" />
  <meta name="viewport" content="width=device-width, initial-scale=1.0"/>
  <title>Card Layout - Float</title>
  <style>
    .card {
      border: 1px solid #333;
      background-color: #fefbe9;
      width: 90%;
      max-width: 800px;
      margin: 40px auto;
      padding: 20px;
      overflow: auto; /* Clear the float */
    }

    .card img {
      float: right;
      width: 200px;
      height: auto;
      margin-left: 20px;
      border: 1px solid #ccc;
    }

    .card h3 {
      font-family: Georgia, serif;
      font-size: 20px;
      color: #222;
      margin-top: 0;
    }

    .card p {
      font-size: 16px;
      color: #333;
      line-height: 1.6;
      text-align: justify;
    }
  </style>
</head>
<body>
  <div class="card">
    <h3>Card Title</h3>
    <p>Card content text</p>
    <img alt="A small image placeholder" data-bbox="750 450 850 550" />
  </div>
</body>
</html>
```

```
}
</style>
</head>
<body>

<h3>The Earth!!!</h3>

<p>

Nature is Earth's masterpiece, a symphony of life composed through
millennia.

Its landscapes whisper tales of ancient mountains, winding rivers, and
flourishing

forests, reminding us of the planet's boundless beauty. From delicate
petals to

towering redwoods, nature's artistry stirs awe and reconnects us to the
essence of

existence. Nature is Earth's masterpiece, a symphony of life composed
through

millennia. Its landscapes whisper tales of ancient mountains, winding
rivers, and

flourishing forests.

  <h1>Heading 1</h1>
  <p>Physics Wallah Limited (commonly known as Physics Wallah; or simply PW) is
an Indian multinational educational technology company headquartered in Noida,
Uttar Pradesh. The company was founded by Alakh Pandey in 2016 as a YouTube
channel aimed at teaching the physics curriculum for the Joint Entrance
Examinations (JEE), National Eligibility cum Entrance Test (NEET) and CBSE board
examinations.As the channel began to gain more viewership, Alakh Pandey also
started to post chemistry content. In 2020, Pandey, along with his co-founder
Prateek Maheshwari created the Physics Wallah app, which allowed students to
access courses related to the National Eligibility cum Entrance Test (NEET) and
Joint Entrance Exam (JEE). PW became India's first Edtech company to achieve a
unicorn status in 2022.[1] As of September 2024, the company is valued at around
$2.8 billion.[2] Physics Wallah confidentially filed draft papers for a $530M IPO
in March 2025.[3]

```

History

Physics Wallah, was founded in 2016 as a YouTube channel hosted by Alakh Pandey, an educator hailing from Prayagraj, Uttar Pradesh. The channel was initially focused on teaching the physics curriculum for the Joint Entrance Examinations (JEE), a popular entrance examination in India.[4] Due to Pandey's style of teaching,[4][5] the channel grew rapidly, reaching over 2 million followers in 2019.[6] In 2020, Pandey along with co-founder Prateek Maheshwari developed the Physics Wallah app.[5] The app was initially designed for students aspiring to take the National Eligibility cum Entrance Test (NEET) and Joint Entrance Exam (JEE)[7][8] and offered courses similar to those of competing companies at an affordable rate.[9] Over the next few years, Physics Wallah expanded their offerings by launching courses for other competitive exams.[10]

As of February 2025, the Physics Wallah app had been downloaded over 10 million times on the Android Play Store. The Physics Wallah YouTube channel amassed 13.3 million subscribers during the same period.[11] In June 2022, the company became a unicorn company after being valued at over \$1.1 billion following its first funding round where it raised \$100 million in funding from various venture capital firms.[12] During the same time, PW also launched its first offline center named Vidyapeeth in Kota, Rajasthan.[13][14] By November 2023, Physics Wallah had expanded to 67 offline centers in 34 cities across India.[15] However, in the same month, Physics Wallah laid off 150 employees, amounting to 0.8% of its workforce, citing performance reasons.[15]

In September 2024, the company raised \$210 million in funding at \$2.8 billion valuation.[16]

Controversies

Allegations by teachers

In March 2023, several teachers at the ed-tech company alleged that the vision of the company was being disillusioned and in response started an independent YouTube channel by the name, 'Sankalp Bharat'. [17][18] Through a video uploaded on the same YouTube channel, they delved into the reasons behind their departure from Physics Wallah, citing the company's atmosphere as the primary factor. Additionally, they alleged that students at the Kota center of Physics Wallah were not receiving an education that justified the tuition fees being charged.[19][18]

In response, a teacher of the company, Pankaj Sijariya, alleged in a video that the three ex-PW teachers – Tarun Kumar, Manish Dubey, and Sarvesh

Dixit were offered Rs 5 crore each to resign from Physics Wallah and join the rival company, Adda247.[20] The three teachers, in a video claimed that Pankaj Sijairya accused them of accepting bribes from rival platform Adda247.[21] The company has refused to comment on the validity of the claims and in a statement to Business Today called the allegations a "distraction".[22]

Acquisitions and expansions

In August 2022, Physics Wallah acquired FreeCo, a doubt-solving platform and marked it as their first acquisition.[23][24][25] Later the same year, Physics Wallah acquired multiple startups that focused on publishing books aimed at helping students prepare for various competitive exams.[26] Physics Wallah also acquired iNeuron from S. Chand Group during the same time.[27] In 2023, Physics Wallah acquired 50% stake from Xylem Learning a hybrid education platform in South India.[28]

In December 2024, Government of Andhra Pradesh and Physics Wallah, have signed a Memorandum of Understanding (MoU) to establish the University of Innovation (UoI).[29]

In popular culture

A 6-episode web series named Physics Wallah on the life of Alakh Pandey (portrayed by Shreedhar Dubey) and his company was released on 15 December 2022 on Amazon Mini TV. The series was created, directed and produced by Abhishek Dhandharia, under his production house, About Films.[30]

5. Problem Statement Explain the z-index, with a code example.

Sure! Let's break it down super simple:

z-index

z-index controls the **stacking order** of elements on the page.

Think of it like layers of paper:

- Lower **z-index** → goes **underneath**
- Higher **z-index** → goes **on top**

But it only works on elements that have **positioning** (**relative**, **absolute**, **fixed**, or **sticky**).

Example: One Box Overlapping Another

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <title>z-index Example</title>
  <style>
    .box1 {
      width: 200px;
      height: 200px;
      background-color: red;
      position: absolute;
      top: 50px;
      left: 50px;
      z-index: 1; /* below box2 */
    }

    .box2 {
      width: 200px;
      height: 200px;
      background-color: blue;
      position: absolute;
      top: 100px;
      left: 100px;
```

```
        z-index: 2; /* on top of box1 */
    }
</style>
</head>
<body>

    <div class="box1"></div>
    <div class="box2"></div>

</body>
</html>
```

What Happens Here?

- **box1** (red) is behind.
- **box2** (blue) overlaps it and appears **on top** because it has a higher **z-index**.

If you **swap the z-index values**, red will be on top.

Remember:

z-index only works when the element has:

```
position: relative;
/* or absolute, fixed, or sticky */
```

Output:-
